

LAMIROL 33

Unique solution which puts together all advantages of roll laminator and pouch laminator in one device. Thanks to LamiRol 33 you can extend the possibilities of your desktop laminator and you can use it as a roll laminator.

Lamirol 33

is an optimal solution for **laminating of relatively low printing volumes.**

Anywhere with inquiry for high **variability** and necessity for **fast & reliable style** with minimum waste at once LamiRol becomes the right partner.

Why to laminate by using this solution?

1. **Opportunity to use thin laminating films:** If you use the thin film in roll – 25 or 38 mic thickness the lamination costs are much lower than costs for using thicker films 75, 125, 250 mic. or laminating with pouches.
2. **Opportunity for one side lamination only:** If the thickness of laminated offset paper is 160g/m² (200g/m² for digital printing paper) you can laminate with 25 mic. PP film on one side only!
3. **Variability:** in few seconds you can change the laminator application: from roll to pouch laminating and vice versa.
4. **Universality:** You can use your LamiRol 33 with any roll infraheated laminator which provides the possibility to remove the roll space top cover.
5. **2 and 1/4" (57 mm) laminating core:** the most current paper core for an easy affordability of your favourite laminating film! You can get a 3" (75 mm) core reduction unit for the widest rolls.
6. **Low price of laminating film:** laminating film in roll is generally much cheaper than laminating pouches.
7. **Quickness and minimizing of waste:** Thanks to LamiRol's clever design is the positioning of laminated document on running film much easier! It minimizes loss of material by following cut of laminated documents and makes the whole following processing faster.
8. **Minimal investment:** If you had your own suitable laminator your investment to LamiRol 33 is minimal in comparison to purchase of a new roll laminator.
9. **Space modesty:** LamiRol 33 does not ask for more space then the desktop pouch laminator itself which is being used together with LamiRol 33.
